

The First Annual Chattanooga Scale Modelers Airfix Club

What is this madness you ask?

We sure hope that by now, you know our Second Annual show is coming in January (the 21st to be precise).

And we're hoping you'll join us in a little extra fun on the side. We don't know if you've noticed, but Airfix has been popping out some really nice little kits these days, and they are CHEAP! OK, the panel lines are a little heavy, and the detail isn't exactly up to Tamigawanuts, but heck, for under \$10, you can't beat 'em. So we're doing a quick club build using them.

And, we'd like to extend a challenge to the rest of Region 3 (and anyone else who'd like to play). Organize a club build of your own. The rules are simple. Only 1/72 scale Airfix airplanes, and built to IPMS OOB standards.

We'll have table space for each club to display their entries, and ballots will be distributed for voting for favorite club collection, and favorite individual entry. Modelers are not limited to one build, and the entries will NOT be judged by IPMS standards. It'll simply be a bunch of model geeks looking at airplane models and pickin' their favorites! There will also be a random drawing from all the individual entries for a shopping spree at MidTenn Hobbies.

So get your guys going, build some quick OOB Airfix kits, let's have some fun, and see what club rises to the top!!!

Oh...and if you can't get your club to play, don't let that stop you. Individual participation is more than welcome as well!!!!

There will be a nominal additional fee of \$5 per club (or \$1 per individual if entering without a club). This will help offset the cost of additional table rentals.
